

Monitor corrosion rates in your cooling system with Corrosion Coupon Racks. Coupon racks provide an accurate and reliable method for monitoring the amount of corrosion in a cooling system. The visual appearance of the coupon can help assist in determining the type of corrosion and amount of deposition in a system.

Our Coupon Racks have the following features:

- Quick Disconnect Holders on all 3/4" Models
- Built to ASME Specifications
- Corrosion Resistant Polyethylene Panel Mount w/mounting holes.
- PVC OR CPVC Construction in 3/4" & 1" Pipe Sizes.
- Up to Six Coupon Holders w/Nylon Hardware
- Inlet / Outlet Isolation Valves

Part Number	Description
